Statement of Inspection for Trueness-to-Name

Amherst, Mass.
September 7, 1949

To Whom It May Concern:

All of the apple varieties propagated and now growing in the nurseries of Barnes Brothers Nursery Company, Yalesville, Connecticut, have been examined by the Massachusetts Trueness-to-name Inspection Service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row.

PLEASE READ BEFORE ORDERING

Non-Warranty—(1) If any nursery stock shall prove untrue to the label under which it is sold, provided notice and proper proof thereof are furnished by the purchaser to the seller, the seller shall, at the option of the purchaser either refill that portion of the order which was mislabeled, by any other delivery of stock, or refund the purchase price; but in any case, we are not to be held responsible for a sum greater than the original selling price of such stock. (2) All sales or agreements of sale are made subject to shortage of nursery stock, fire, frost, floods, drought, or other causes beyond the control of the seller.

Terms—Net Cash. We will ship orders C.O.D. providing 25% of the total amount is sent with order.

Transportation Conditions—All goods, unless otherwise specified, are sold F.O.B. our nursery, and travel at purchaser's risk and expense.

Size of Orders—Owing to high costs incident to packing and handling, we cannot accept orders amounting to less than \$1.00.

Plants by Mail—Small orders can be sent by mail, but they will not be sent prepaid unless you add to your

remittance 10% of the catalog price to cover postage and special packing. (Minimum charge, 25c.)

Claims—If there are any claims, they must be made on receipt of goods. Any error of ours will be promptly and satisfactorily adjusted. Claims made after 10 days from receipt of goods cannot be considered. We ship only best grades of stock and use great care in packing. Due to conditions beyond our control, growth of plants cannot be guaranteed.

Inspection—Our nurseries are regularly and thoroughly inspected by the Connecticut Experiment Station and found apparently free from injurious insects and diseases.

Blueberries

These improved, cultivated Blueberries have produced wonderfully large, plump, tender fruits of delicious flavor. It is essential that they be planted in groups of more than one variety in order to insure cross pollination.

Besides producing this superb fruit, these plants are ornamental at all times of the year. They are suitable to include in a shrub border, growing about 6 feet or more high and their Fall coloration is brilliant.

Blueberries require an acid soil containing an abundance of vegetative matter, like peat, moderate soil moisture and good drainage. Plant about 4 feet apart. Blueberries require pruning to maintain large-sized fruits. Planting instructions will be sent without charge.

We offer the following varieties of fruiting age: Strong, transplanted, 3 yr. plants, 18-24 in. high at \$1.75 each, 3 for \$4.80, 6 for \$9.60, 12 for \$16.20
